

AMENDMENTS TO THE SPECIFICATION

Please replace the first paragraph beginning on page 6 of the specification as filed with the following amended paragraph:

Moreover, the semiotic base of the language computer preferably further includes an electronic dictionary for holding a plurality of dictionary items including lexico-grammatical information and semantic information. The lexico-grammatical features held in the lexico-grammar base and the semantic features held in the meaning base are associated with the lexico-grammatical information and the semantic information of each of the dictionary items held in the electronic dictionary, respectively. In this case, the meaning processing mechanism of the language computer refers to the electronic dictionary to output a dictionary item including the semantic feature included in the local plan and the identified lexico-grammatical feature, and refers to the lexico-grammar base to combine the identified lexico-grammatical feature with the outputted dictionary item, so that the meaning processing mechanism ~~generats~~ generates a language text.

Please replace the second paragraph beginning on page 21 of the specification as filed with the following amended paragraph:

Furthermore, information processing in the client language computer 12 and network language computer 22 includes information processing, most of which is carried out by the client secretary agent 17, and information processing which is mainly carried out by ~~the client~~ machine. In accordance with the kind thereof, the procedure for processing information varies.
